Leo Stone is a flexible mean, with a perfect natural appearance, that allows the architect to award appearance to his design without the restrictions of shape and size. The attractiveness of this stone is due to an ingenious combination of natural elements that fashions varying shades within the same color. Our stone can take form of any design required by the designer, either exterior or interior such as villas and palaces as complete projects.

*designoArt presents to the public a unique line of elements primarily classified through metal and wood. Our metal assortment defines itself with altered alloys that produce colors of copper, aged cuprum, yellow brass, aich's alloy(gold), red brass, architectural bronze, iron, and much more. Our wood rudiments are endless in type and offer a specialty in finishes similar to old, aged, and antique resemblance. The elements can take form of any design requested by the designer, either exterior or interior to create artistic furniture pieces, decorative objects, custom doors, and more of an infinite dwelling of imaginative forms of décor. In addition, Leo Stone can be added coherently with any element to produce the desired product.*
